If you like our work, please buy us a coffee (18-carat gold) and stay tuned on our Facebook page: This is an icon set I made for my Custom Windows Phone App. It includes 26 Metal icons from a new feature in the Windows Store. Use them for app tiles, the status bar or the start screen. The set contains lots of icons, for many types of applications: games, streaming applications, e-books, music apps, productivity apps, tutorials, social networking apps, VR, apps for windows tablet, and more. I built the icons in a clean, minimal and mobile-friendly style. You can edit them and make your own modification. Everything you need to create Windows 10 apps, plus a lot more. I recently noticed that you need to run an XML parser on the Windows Phone Emulator to get your app to compile. This would be a problem for me, as my emulator is a virtual box and there isn't any XML Parsers that I can get. I was wondering if there is a way around that and if someone could share how to do it so I can compile on the emulator. This icon set was originally a collection of icons used in a real project. They were designed for a social network application and share the same aesthetics and visual patterns. Over 70 icons, divided in different categories, as well as a tutorial on how to create your own icons. You can use them in your own applications, websites, blogs, as a wallpaper, and even for t-shirts. This set contains 20 small icons which can be used in various contexts. The application icons are available in various sizes as well as in PSD. Check out this sample to see what they can do for your project. Icons are must-have elements of any kind of project, be it web, mobile or desktop. They represent anything and everything.
