The invention relates to a truck cargo bed cover of the type used for covering the cargo bed of a truck or other vehicle which has a box-like cargo bed. In the prior art there are various types of covers used for covering the cargo beds of trucks. Most of the covers in the prior art are intended to seal the cargo bed and prevent access to the interior of the cargo bed. Commonly, the covers have a plurality of slots formed in the covers for permitting air to be exhausted into the cargo bed. There are also covers which have vents for permitting air to enter into the cargo bed. The covers in the prior art can be difficult to put on and take off the cargo bed of the truck or other vehicle. The covers normally require a lift system to be used in order to install the cover onto the cargo bed of the truck or other vehicle. The lift system adds expense to the cover. The invention seeks to overcome the problems and disadvantages of the prior art and provide an inexpensive cover for covering the cargo bed of a truck or other vehicle which is easy to use and can be easily removed from the cargo bed.
