
CRACK Windows 10 Pro Permanent Activator Ultimate 2018 5.1

windows 10 pro permanent ultimate 2018 5.1 Hello. Windows 10 Pro permanent. There was one account (user) on the computer. Now we need to add another account. I know how to do this, you need to click "add" in the properties of the account. I added, but I got another account - "Administrator". How to make it so that "Administrator" from the same account appears instead. How to create a second folder "Administrators" in the "Users" folder? Where is this "Administrators" folder?
