KEYMACRO is an integrated development environment

for Microsoft Access. In addition to the management of text documents, macros, dialog boxes, reports, forms, and other user interfaces, it allows you to easily design and create functions, procedures and VBA programs. All the data needed to compile a project are displayed as controls and generated when you enter data. KEYMACRO contains the following modules:

- Visual Components, such as dialog boxes, lists, graphs, forms, reports, tables, text, buttons, groups, forms, queries, reports, input masks and more
- Input, Output, Database, Actions and Effects
- Linking
- Data
- Visual Library

Key Macro supports both Access and Excel databases. Key Macro is very easy to use because it makes it possible to develop applications in a simple and quick way. A user can also create and design forms and reports directly from the program. It is possible to access both Microsoft Access and Excel databases. Simplified menu and context-sensitive help

Key Macro is an intelligent and easy-to-use program. It supports the context-sensitive help function that is available in Microsoft Access.

- The display of menus is simplified by replacing a simple menu bar with a Ribbon, which can be displayed as a separate window, or directly integrated into the application window.
- Context-sensitive help is supported by displaying a list of menu items as icons with a context sensitive menu.
- The Ribbon toolbar is split into two or three tabs that can be displayed at the same time in the program window.
- The view of menus, toolbars, tabs,

list views and more is simplified by using a ribbon for navigation. Key Macro is an integrated development environment for Microsoft Access. In addition to the management of text documents, macros, dialog boxes, reports, forms, and other user interfaces, it allows you to easily design and create functions, procedures and VBA programs. All the data needed to compile a project are displayed as controls and generated when you enter data. Key Macro contains the following modules: • Visual Components, such as dialog boxes, lists, graphs, forms, reports, tables, text, buttons, groups, forms, queries, reports, input masks and more • Input, Output, Database, Actions and Effects • Linking • Data • Visual Library Key Macro supports both Access and Excel databases.
