Autodesk AutoCAD is a commercial computer-aided design (CAD) and drafting software application. Developed and marketed by Autodesk, AutoCAD was first released in December 1982 as a desktop app running on microcomputers with internal graphics controllers. Before AutoCAD was introduced, most commercial CAD programs ran on mainframe computers or minicomputers, with each CAD operator (user) working at a separate graphics terminal. AutoCAD is also available as mobile and web apps. ## AutoCAD Crack+ For PC [March-2022]

EXCEL: the AutoCAD extension to Microsoft Excel, which was first announced on 16 May 2008, was integrated into the AutoCAD 2007 release. The Excel plugin for AutoCAD makes it easier to view and edit drawings directly within Excel, including editing and annotating AutoCAD drawings using the Excel interface. It allows you to view and create AutoCAD-compatible drawings in a spreadsheet. You can create AutoCAD drawings, even using a mouse. AutoCAD 2008 includes the Excel plugin. DELMIA: the AutoCAD extension to DELMIA, which was released on 6 June 2007, brings AutoCAD directly into the new AutoCAD compatible Delmia environment. This plug-in allows the import and export of drawings to and from AutoCAD. It integrates with AutoCAD LT as well, so it can import and export drawings, even from older releases of AutoCAD. TINA-TILE: the TINA-TILE add-on allows you to view and annotate your drawings using a mouse. You can view, edit, or annotate a drawing directly in the TINA-TILE application. TILE: The TILE add-on allows you to view and annotate your drawings. Rendition: the AutoCAD rendition product (rendition.dll) was released in AutoCAD 2004 and is no longer offered. Customization Manual customizations are specific settings of AutoCAD that can be changed via the command line or within the Options dialog. Manual customizations are used for example to change the appearance of new objects, or to limit the types of objects that appear in the Outliner. Manual customizations are stored in XML format, using the '.acm' file extension. Polygon and path painting: AutoCAD has support for Polygon and Path (path is a special type of Polygon) painting in which the user can paint with a brush on the outline of a drawing and fill the shapes in the drawing with a solid color. Using color fills with the Polygon and Path tools was previously only possible with the drawing commands (such as SCENE or ZOOM). In AutoCAD 2014 the Polygon and Path tools have new Paint mode where the user can paint the fill color on the outline of a polygon or path, and the objects are automatically filled. Sketching AutoCAD has the ability to export a variety of drawings to the Windows clipboard. ca3bfb1094

Kate 'n' K9: Dave & Charlie Get Puppy Our dogs are the first things we notice when we come home, but they're also the first things our guests see when they come over. Kate 'n' K9 for my new magazine's first Christmas cover feature was a fantastic opportunity to create a puppy photo shoot for my new magazine's first Christmas cover. Dave and Charlie, two four year old, Staffordshire Bull Terriers have been my boys since they were a puppy. They were both born in the hospital with me, so they've always had me around for comfort and company. When Dave was about to turn six years old we decided to get him a sister for Dave, and a little brother for Charlie. After searching for the perfect breed, we chose to get two Jack Russell puppies, because we wanted some longevity in them. A local puppy rescue offered to take the two puppies we wanted and said they'd be more than happy to deliver. Luckily, their cocker spaniel sister, Em, who is one year old was around the house. A perfect match. Em and Katie are both so sweet. The photo shoot was so much fun. We had to keep the shoot very simple. The dogs' personalities shine through. Dave is loving and affectionate, but he's also very naughty, and Charlie is rather aloof, but once you get to know him, he's so lovely. I had to keep their moods in check while I was working, so it was so important to work closely with the puppies and follow their lead. I wanted them to know that the photographer was their friend and loved them and didn't mind them being around, so I encouraged them to get to know her and allow her to be their friend. The shoot was done in natural light, and all of the light came from the four foot long open window and the sun streaming in through the white curtains and blinds. It was such a great opportunity to get some beautiful photos of the dogs, just being puppies, and I'm so happy with the final images. Want to see some of them in your Christmas cards? I'd love to
